HEALTH IN PORTUGAL IN 1986 VS TODAY

LIFE EXPECTANCY: 73 YEARS

BIRTH RATES: 127.000/YEAR

IN 1986, HOSPITALS WERE SIMPLE AND NOT VERY MODERN, WITH OLDER BUILDINGS AND BASIC EQUIPMENT. PEOPLE OFTEN HAD TO WAIT A LONG TIME AND IT WAS HARDER FOR PEOPLE IN RURAL AREAS TO GET ACCESS TO HEALTHCARE.

TECHNOLOGY WAS BASIC AND NOT VERY ADVANCED. HOSPITALS HAD SIMPLE MACHINES LIKE X-RAYS, BUT MORE MODERN EQUIPMENT WAS RARE AND EXPENSIVE. MOST INFORMATION WAS WRITTEN ON PAPER INSTEAD OF COMPUTERS.

HEALTH IN PORTUGAL IN 1986 VS TODAY

LIFE EXPECTANCY: 83 YEARS

BIRTH RATES: 88.000/YEAR

TODAY, PORTUGAL IS QUITE MODERN WHEN IT COMES TO HEALTHCARE TECHNOLOGY. THE COUNTRY HAS BEEN INVESTING A LOT ON DIGITAL HEALTH, USING TOOLS LIKE TELEMEDICINE, ONLINE PLATFORMS, AND ARTIFICIAL INTELLIGENCE TO IMPROVE CARE.

DOCTORS USE COMPUTERS MOST OF THE TIME. IN FACT, DURING MOST APPOINTMENTS, DOCTORS WORK ON A COMPUTER WHILE TALKING TO PATIENTS. THEY USE IT MOSTLY TO WRITE NOTES, CHECK MEDICAL HISTORY AND WRITE PRESCRIPTIONS.

HEALTH IN **PORTUGAL** IN THE **FUTURE**

IN THE FUTURE, ROBOTS WILL LIKELY HELP DOCTORS EVEN MORE, ESPECIALLY IN SURGERIES, PRECISION TREATMENTS, AND PATIENT CARE.

HEALTH WILL BECOME INCREASINGLY DIGITAL, WITH ONLINE CONSULTATIONS, WEARABLE HEALTH DEVICES, AND AI HELPING DIAGNOSE AND MONITOR PATIENTS.
