

Identity Card
in 1986

Citizen Card in 2007

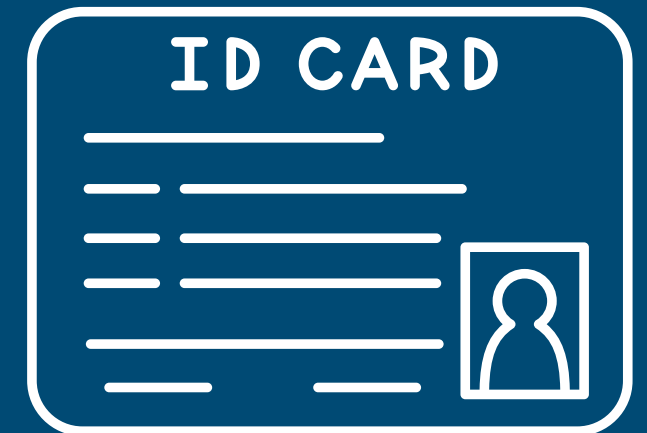

Portugal in 1986

What document did people use?

In 1986, the official identification document used in Portugal was the Identity Card (BI).

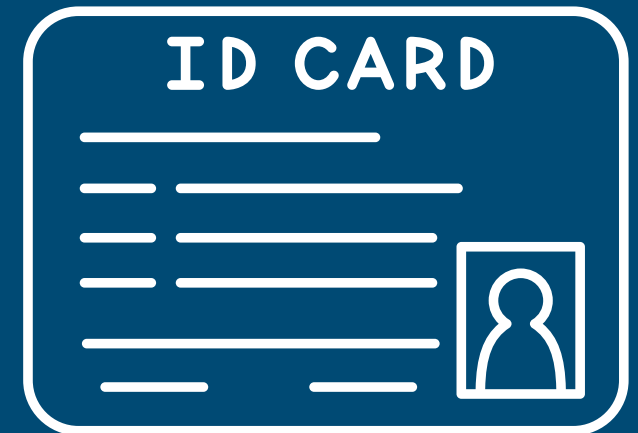

Was it digital?

No, it was not digital. In 1986, Portugal's Identity Card (Bilhete de Identidade) was a physical paper-and-plastic document with a photo, fingerprint, and handwritten information, without any electronic or digital features.

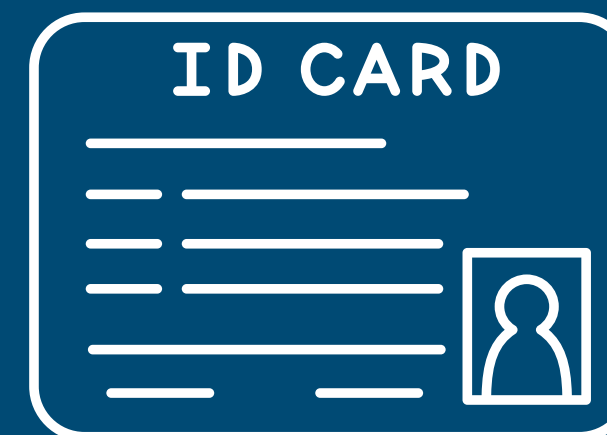

Portugal Today

What is the Citizen Card?

The Citizen Card in Portugal today is a physical smartcard with a secure electronic chip that identifies a Portuguese citizen and replaces several older documents.

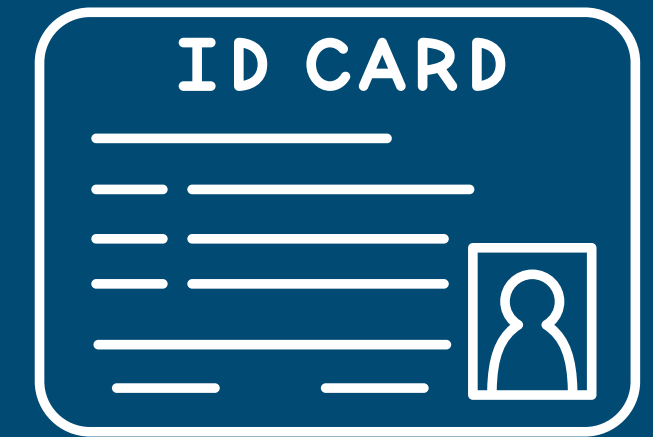

What can you do with it?

You can use the Portuguese Citizen Card for identification, digital authentication, online services, and even travel within Europe.

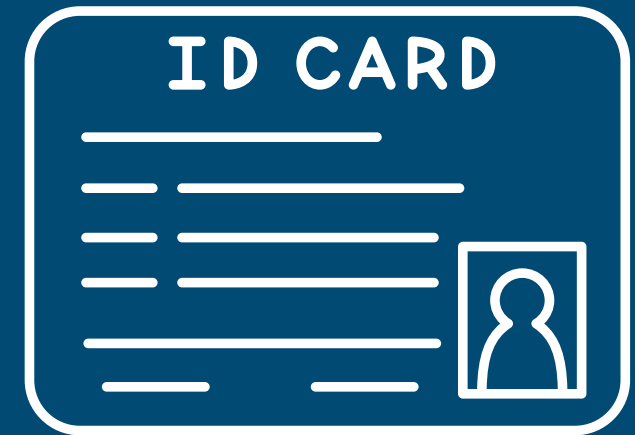

Future

Will ID be digital?

Yes, Portugal and the European Union are moving toward a fully digital ID, but the physical Citizen Card will not disappear in the near future.

Will people use face recognition?

Yes, facial recognition is already used in Portugal today, and it will likely become more common in the future, especially for secure digital identification.
